Hiring Manager

Dell
Round Rock, TX, United States

Dear Hiring Manager,

I am writing you today regarding the IT Software Engineer at Dell. I came across this opportunity after finding the job listing on Indeed, and became eager knowing I could possibly be working for a company so dedicated to creating a better future.

My passion for computers started long before I could walk, so it only made sense for me to pursue a career in which I could utilize this passion. In high school, I made sure to take the first programming class offered, as I became anxious to learn everything I could, and doing so only made my keenness for computers grow. After high school, I knew I wanted to expand on the knowledge I had acquired, so I decided to study Computer Science at Texas State University, in which I graduated in the Spring of 2021.

At Texas State University, I have learned the skills necessary to become a knowledgeable and effective software engineer. Learning how to code in C++, Java, and Python, has given me the opportunity to expand not only my understanding of specific concepts such as data structures and parallel computing, but my understanding of the field as a whole.

If given the opportunity to work for Dell, I am confident that I can support your team and bring the same enthusiasm I have for computers to your company. I look forward to speaking to you about this opportunity.

Best Regards,

Alexander Gonzalez
